

Rontis, a multinational healthcare company, is looking for

Production Engineer

based in Larissa, Greece:

Job brief

We are looking for a Production Engineer to join our Pharmaceutical Department in our production site in Larissa.

Responsibilities:

- Production Procedures coordination and follow-up.
- Equipment trouble shooting and problems handling.
- Planning of production operations.
- Improving the production efficiency respecting the product quality.
- Ensuring the compliance of the production procedures with the quality system.

Required Qualifications:

- University Degree in Mechanical Engineering or Chemical Engineering.
- Excellent knowledge and handling of both verbal and written English language.
- Good knowledge of MS Office suites (Word, Excel, Power Point, Outlook).
- Ability to work accurately in a busy and demanding environment, adhering to strict deadlines/timescales. Strong analytical and problem-solving ability.
- Excellent organizational and communication skills.
- Previous experience in relevant position is considered as plus.

This is a full-time position.

Candidates are welcome to send their CV to hr.larissa@rontis.com, noting "Candidacy for Production Engineer Position".
