

Rontis, a multinational healthcare company, is looking for

**Validation Engineer**

based in Larissa, Greece:

**Job brief**

We are looking for an Engineer to follow up the Validation (IQ/OQ/PQ) procedures of the machinery and equipment in our Factory in Larissa.

**Key responsibilities**

- Develop and conduct validation quality tests based on appropriate protocols (GMP, ISO)
- Manage validation documentation, and prepare summary reports and risk assessments
- Calibrate and repair systems and machinery
- Prepare and maintain testing equipment
- Perform troubleshooting
- Ensure compliance with safety and quality standards

**Requirements & Skills**

- Degree in Mechanical or Production Engineering or relevant subject
- CAD design applications knowledge
- Previous experience as a validation engineer or in a similar role
- Excellent knowledge and handling of both verbal and written English language
- Strong understanding of manufacturing quality processes and safety regulations
- Attention to detail
- Teamwork skills

Candidates are welcome to send their CV to [hr.larissa@rontis.com](mailto:hr.larissa@rontis.com), noting "Candidacy for Validation Engineer Position".
